## *Hypertherm*®

## Viper and Python plasma system advantages

## Best performance in its class

- Long consumable life and fast cut speeds lower your cutting and gouging costs.
- High portability, simple controls, and a stable plasma arc make Viper and Python systems easy to operate, even for beginners.
- With the widest array of torches and specialty consumables, Viper and Python systems can be configured to address a wide range of applications from extended reach cutting to precision gouging and more.
- For the new Viper65 SYNC, Python85 SYNC, and Python105 SYNC, the single-piece cartridge makes knowing when to replace consumables easier than ever. With the all-new, efficient SmartSYNC™ torch in your hands, adjustments and quick consumable replacements are a breeze.

## Viper and Python

Product line overview

<sup>\*</sup> One-phase and three-phase models are two separate products.

 $<sup>^{\</sup>star\star}$  400 V and 600 V models are two separate products.

<sup>\*\*\*</sup> If you are marking with the Powermax45 XP, argon can be used to produce shallower, narrower marks and a cleaner final product.
